PREFACE.

I HAD intended that these Tables should form a part of my "Merchants' and Bankers' Companion," but fearing that the book would be made bulky and cumbrous, and knowing that the Tables would be useful only to Shippers and Shipowners, I thought it advisable to publish them in a separate pamphlet, to which I hope the public will accord the same support that my "Merchants' and Bankers' Companion" has already received.

The want of such a book having been greatly felt by the Shipping community, prompted me to devote my leisure to this work, and I have taken the greatest care to make it as accurate as possible.

It is to be regretted that there is not a uniform Tonnage Scale for all British ports in India, as the absence of such a scale not merely causes inconvenience but very often serious pecuniary loss. I hope some enterprising Merchant will take up this subject and move in the Bombay Chamber the adoption, with the consent of the other Chambers, of one uniform Tonnage Scale for the whole of India. I have raised my feeble voice hoping that some one more powerful will ventilate the question in the interests of the Mercantile community.

Out of about 180 articles of export, only 18 are shipped below 12 cwt. in a Ton, so I have not given these Tables, as they would only increase the size of the book and at the same time its price. But the information required can be obtained as explained in the Directions for using the Tables.

I have given as an Appendix "a Tonnage Scale for the whole of India," which I trust will be of great assistance to Merchants. I submitted this part before it was printed to all the Chambers of Commerce in India for their approval and correction, and take this opportunity of thanking those Secretaries of Chambers who have kindly given their attention and offered suggestions towards making this part as correct as possible; and I hope Merchants will indulgently overlook errors if they meet with any, and kindly report them to me, when they shall be promptly corrected.

It would be ungrateful on my part to allow this opportunity to pass without expressing my thanks to Messrs. Mackinnon, Mackenzie & Co., Agents British India Steam Navigation Co., Limited, and especially to Mr. J. L. Mackay, for their kindness and valuable patronage, and to the enterprising. Superintendent of the Education Society's Press, Byculla, for the accuracy and efficiency with which he has executed the printing of my works.

DIRECTIONS FOR USING THE TABLES.

The freight on all articles that are shipped for export is assessed at a certain standard. Those packages or cases that are measurable are taken under measurement, the rest by weight.

The Tables to calculate freight by measurement are given in my "Merchants' and Bankers Companion;" the Tables to calculate by weight will be found in this work.

According to the space articles occupy the Chambers have adopted their Standard of so many cuts in a ten, which Merchants are bound to accept in the absence of any other stipulated conditions. These different Standards will be found in the Appendix to this work.

I have given Tables for 12, 13, 14 15, 16, 17, 18, and 20 cwt. in a ton; and these will furnish 6, 7, 8, 9 and 10 cst in a ton by multiplying the weight by 2 or doubling the rate per ton. The easiest way to find freight of 6, 7, 8, 9, and 10 cwt. per ton is to double the weight and look in the column of 12 for 6, 14 for 7, 16 for 8, 18 for 9, and 20 for 10, and of 5 cwt. in a ton to multiply the weight by 4 and look in the column of 20 cwt.

The weight of every article is given in cwts. qrs. and lbs., while freight is calculated at so much per ton of so many cwt.; divide the cwts. only by the figures which indicate the number of cwt. in a ton, and then begin as follows:—

Ex. I.—Find the freight on a shipment of goods weighing 195 cwt. 1 qr. 23 lb. at Rs. 15\frac{1}{2} per ton of 12 cwt. in a ton.

Here divide 195 cwt. by 12, the figure which indicates the number of cwt. in the ton, which is equal to 16 tons 3 cwt.

Ex. IV.—What amount of freight must be charged on a shipment of goods weighing 325 cwt. 2 qr. 8 lb. at 30s per ton of q cwt.?

Here as in the above example multiply the weight by 2 and find in the column of 18 cwt. on page 115, or double the rate, 30s. and find in the column of 18 cwt. on page 175 of 60s. per ton.

Divide 325 by 9, the number of cwt. in the ton, which is equal to 36 tons 1 cwt., and multiply the weight (36 tons 1 cwt. 2 qr. 8 lb.) by 2 = 72 tons 3 cwt. 0 qr. 16 lb.

TONNAGE SCALE FOR THE WHOLE OF INDIA.

Note.—B—Bombay. C—Calcutta. Ch—Cochin. Cy—Ceylon. K—Kurrachee. M—Madras.

N. B.—Almost all the ports in India adopt the Tonnage Scale of the Presidency to which they belong, except where otherwise marked:—as Coconada or Cochin, that of Madras; Kurrachce, that of Bombay. Galle and Colombo, though they do not belong to the Madras Presidency, have adopted the Madras scale, except where otherwise specified.
